What is a Corpse Drawing?
Exquisite Corpse is a vintage drawing game that breaks down the body into three sections: the head, torso, and legs. Keeping each section a surprise to the next person, the combination of ideas becomes unpredictable and hilarious!

Materials Needed
- Paper
- Pencil or markers
- Any image you’d like to take inspiration from.

How to Play:

Step 1:
Fold your paper into three sections, folding along the long edge.
Step 2:

Making sure to only draw on the top section, draw the head of the corpse. Remember to keep this a secret from your partners!

Step 3:

Be sure to extend your neck lines into the middle (torso) section so the next person knows where to continue the drawing. When finished, fold over the top section so only the middle section is showing. Pass on to the next person.
Step 4:
The second person draws the torso. When finished, be sure to also extend the torso lines into the bottom section. Fold over the drawing so just the bottom section is visible for the next person.

Step 5:
The third person draws the legs and finishes the drawing! Once finished, unfold and reveal your collaboration!
